SOFTWARE ENGINEER

React, React Native, Vue, Flutter, Dart, Material, Deployment, JavaScript, .Net, C#, Node, Python, Django, Express, Rails, Ruby, Semantic HTML, SQL, CSS, Postgres, Git Workflow, jQuery, Bootstrap, Sass, JWT Authorization

EXPERIENCE

Flatiron School

Denver, CO

Software Engineering Instructor

08/2019 - Present

- Teach 200+ students, both existing and Alumni, in Ruby, Rails, JavaScript, React, and React Native.
- Conduct both the Admissions and Final Modules' technical interviews, verifying students' aptitude and job-readiness.
- Provide one-on-one JavaScript, React, and Rails tutoring, conducting lectures, and reviewing/debugging code in Python, Vue, React Native, Node, and Flutter.
- Collaborate closely with the engineering and curriculum teams to keep material up to date and debug apps that deliver curriculum to students.
- Create and design weekly afternoon whiteboard challenges, coordinate 36 guest speaker series, create weekly networking newsletter, connecting students to Denver's tech scene, and oversee and prepare curriculum for our weekly professional development and technologies tangential to software developers.

Organizer: Alumni Code Night, and Good Morning Habits Hour

- Founded Alumni Code Night to provide bootcamp graduates with the opportunity to collaborate on large scale programming projects that benefit the Denver Community.
- Coordinated with team leads to assist them in successful project management, and development leadership.
- Founded Good Morning Habits Hour to lead current students and alumni in daily sessions of professional development and technical interview coding practice.

FacePalm Software

Colorado Springs, CO

Founder and Lead Engineer

01/2020 - Present

- Oversee teams of engineers and assist in project management, product ownership, development, and deployment of mobile and web applications centered around gamifying tech education.
- Set vision for the organization and give opportunity to recent software engineering and UX/UI bootcamp graduates to collaborate on large scale, public facing projects.
- Lead Engineer for [CodeCrown](#) A React Native Mobile app that gamifies the learning of programming concepts.

ADDITIONAL EXPERIENCE

Develop Denver

Denver, CO

Education and Content Team Member

01/2020 - Present

Develop Denver's mission is to "connect and educate the Denver tech community."

- Source Speakers and run Technical Meetup Series on topics and moderate Mobile Debate: Native vs PWAs.
- Work with a team to pivot the annual conference into something more remote friendly for the year of 2020

Rutledge's Men's Custom Clothing Company

Colorado Springs, CO

Operations Manager

02/2016 - 11/2018

- Developed a recruitment strategy. Hired, trained, and managed team members.
- Built a complete digitized system of how-to and resource guides for the responsibilities associated with my role and the Accounting, CRM, and Inventory tools I built.

Process Engineer

02/2015 - 02/2016

- Built and managed a cloud based system to provide the customer relationship management tools not being fulfilled by our CRM. Integrated this system into our CRM.
- Oversaw the IT, receiving, shipping, merchandising, and accounts payables department.

EDUCATION

Flatiron School

Denver, CO

Full Stack Web Development, Ruby on Rails and JavaScript program

04/ 2019 - 08/2019

Hillsdale College

Hillsdale, MI

Bachelor's Degree in Economics
